

# Confluence Wiki

Confluence is a feature-rich wiki for rapid and collaborative website creation. It is integrated into UVaCollab as a tool that can be used for any course or collaboration site. Confluence simplifies publishing online while still allowing for powerful, automated features like footnotes, tables of contents, labels to aid the searching of pages by content, and much more. UVA maintains its own Confluence server for use by all members of the university community.

▾ [Read more...](#)

Common uses include:

- Collect documentation
- Maintain class schedules and timelines
- Set goals and assign work
- Develop collaborative outlines
- Solicit and receive feedback among groups
- Create and manage organizations

As a platform, Confluence works well for the purposes of teaching, learning, research and outreach.
