

Users and Privacy

WordPress allows you to manage [user roles](#) through UVaCollab, including restricting your site to a private audience or [otherwise managing viewing](#). WordPress also welcomes [commenting](#), allowing conversations to develop between readers of each post. If you choose to utilize commenting, you will need to ensure compatibility with your theme, and take steps to [prevent spam comments](#). Once in place, comments may be allowed / disallowed for specific posts and comments may be moderated on an individual basis through the back-end interface of WordPress. Note that you cannot do this through the WordPress interface.
